The NS Tranz mouthpiece is ergonomically designed for both comfort and communication. A very popular comfortable mouthpiece that promotes feel and responsiveness encouraging a soft sustainable contact. Our short link NS Tranz Angled Lozenge is aligned, uniquely, at 20° to the bore axes of the cheeks. When a contact is taken, the smoothly profiled lozenge and loops press gently down onto the centre of the tongue thus a higher level of communication through the rein is achieved.

The more pressure - sensitive side areas of the tongue are thus relieved and the thicker less pressure-sensitive area is brought into play. The double joint allows more flexibility ensuring a clearer and more independent rein aid.

CODE	MOUTHPIECE	THICKNESS	DRESSAGE LEGAL	RING SIZE	4 1/2" 114mm	4 3/4" 120mm	5" 127mm	5 1/4" 133mm	5 1/2" 140mm	5 3/4" 146mm	6" 152mm	6 1/4" 159mm	6 1/2" 165mm
8022-55	TRANZ	14mm	Y	55mm									
8022-70	TRANZ	14mm	Y	70mm									
8023-70	TRANZ	16mm	Y	70mm									
8024-70	TRANZ	18mm	Y	70mm
