

Turtle Family - Fitting made easier

TurtleTop™, Turtle Tactio™ and the Flex design concept together make identifying the optimum length of your bit easier than ever.

The improvement in fit to mouth anatomy means that selecting the ideal Turtle Top™ or Turtle Tactio™ with Flex bit for your horse is readily achieved. Simply use the Neue Schule colour coded measurement chart for guidance.

Products are available in sizes between 108 and 168 mm (that's just less than 4¼ inches to just over 6½ inches) – so there's an ideal size for everyone!

Simply lay your existing bit on the chart and the size of the Turtle Top™ or Turtle Tactio™ with Flex bit you need is immediately indicated.

Measure mouthpiece width from inside cheek to inside cheek
