A modern, versatile cheek design with four different rein options plus a curb option. This enables the rider to achieve their objective as various ways of going may be encouraged.

Speed Control – Amplifies the rein aids for a downward transition.

Poll Relief – Highly recommended for horses with poll sensitivity.

Outline – Helps the rider establish a correct outline and self-carriage.

Turning – Reinforces the rein aids for tight turns and straightness.

This clever combination of cheek and mild mouthpiece allows the rider to reward instantly once the horse has responded to the rein aid.

The Turtle Tactio mouthpiece has been designed to benefit those horses with large or sensitive tongues and also reduces bar pressure. It is one of the few, very mild mouthpieces that also enhances the feel and response through the rein. Extremely useful for those horses who are 'wooden' to the rein aids.

This revolutionary design delivers the comfort of a fat bit, whilst taking up very little room in the mouth. Created in response to recent research which has shown that there is not as much space in the mouth as previously thought.

CODE	MOUTHPIECE	THICKNESS	DRESSAGE LEGAL	RING SIZE	S 118-128mm	M 128-138mm	L 138-148mm	XL 148-158mm	XXL 158-168mm
